# Industry 4.0:

## Smart Production Microelectronics, IPCEI Project

### Free Online WORKSHOP

Workshop on Smart Production organized by the Austrian company **Infineon** and **ADVANTAGE AUSTRIA Bulgaria** will delve into the challenges faced and the innovative solutions developed

- **Smart Production: What defines a smart production?**
- **What capabilities are required to drive a world class semiconductor FAB?**
- **Get an insight of Infineon newest wafer Fab and its automation and Industry 4.0 journey**
- **A short outlook on next upcoming challenges.**

The workshop offers an interactive platform to connect participants from industry, research and education and Infineon to explore future collaborations opportunities to tackle remaining challenges in the field of Smart Production.

# PROGRAM

- 10:00 – 10:05**      **Welcome**  
Philippe Kupfer, ADVANTAGE AUSTRIA Bulgaria
- 10:05 – 10:20**      **Introduction IPCEI on Microelectronics /  
Internship and PhD Programs (IPCEI HR Topic)**  
Emir Demircan & Veneta Ivanova,  
Infineon Technologies Austria
- 10:20 – 11:20**      **Industry 4.0: Smart Production**  
Richard Lippe & Heinz Veitschegger,  
Infineon Technologies Austria
- 11:20 – 12:00**      **Q & A**

**Infineon** is a globally leading semiconductor player with more than 50.000 employees. We are leading in automotive, power management energy efficient technologies and the IoT while Global megatrends underline the increasing importance of microelectronics.

**IPCEI Microelectronics** is the largest pan-European initiative in the field of microelectronics. It opens significant opportunities for universities, research institutions, industry representatives, start-ups and engineering students from across Europe to address technological, market and societal challenges that could not otherwise be tackled. Infineon Austria is part of this strategic effort.

We call it our Mission Future. You, too, can join our Mission Future and benefit from many opportunities!

**Register until  
30<sup>th</sup> May 2022**
